

# E-Z DUNGEONS

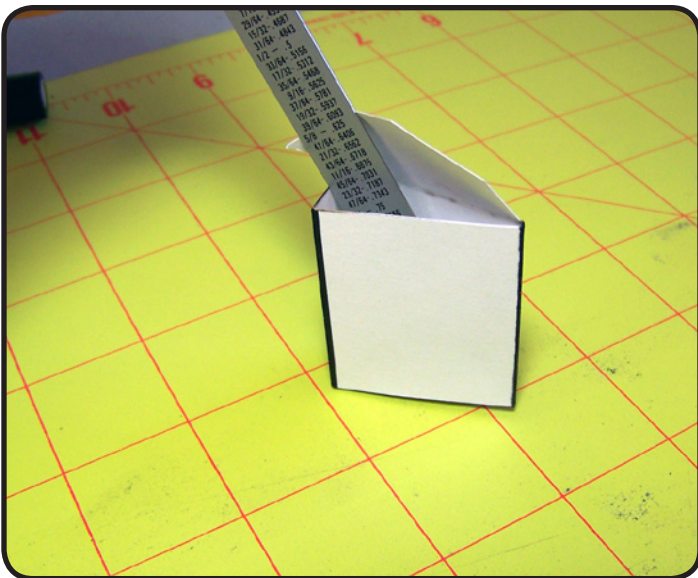

## Secret Door

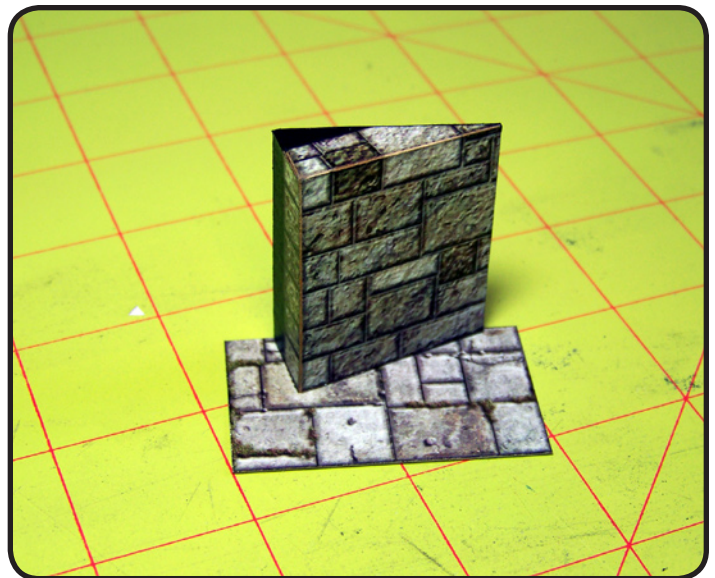

Cut, score and test fold the two pieces of the secret door model as shown above.

Glue the main door piece along the long edge and allow to dry.

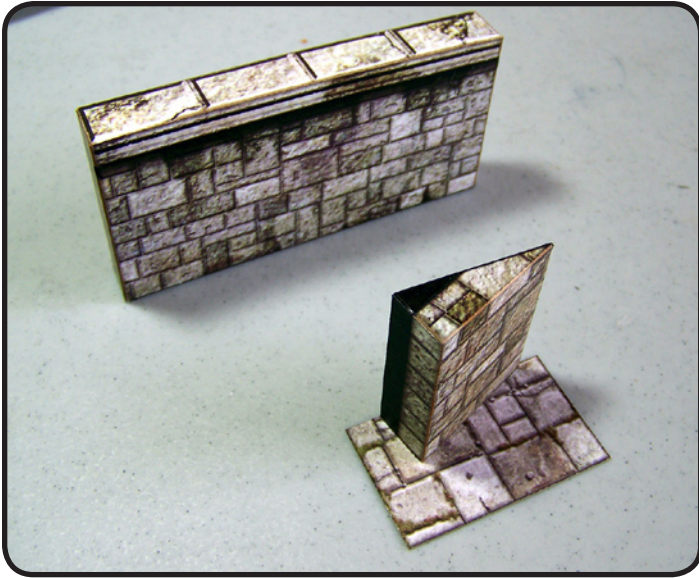

Next glue the top flap in place. Turn your model over and place on a flat surface to ensure the flap glues flush with the side edges. At this time you can insert a small ruler or pencil to apply pressure internally to the glue tabs.

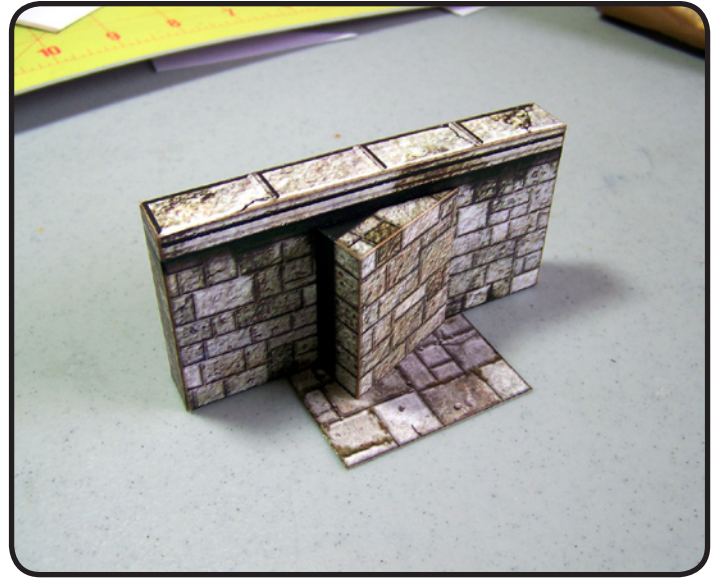

Repeat with the bottom flap, and then glue to the base piece as shown above.

# E-Z DUNGEONS

The secret door is not intended to be permanently attached to a wall section, but rather remain 'free floating' so it can be easily added where required during the game.

The finished model, when butted up against a wall section, creates the perfect illusion of an opening door.
