

100 Random Events

for Gamma World™ (All Editions)

Here is a list of small scale events for Gamma World™ campaigning. They work best when used to spice up a new village or town that the PC's are visiting for the first time or when used to break up what would otherwise be a boring passage of time spent in a settlement recuperating or training. Most of these are deliberately vague enough to serve as either a background event or a springboard to an actual adventure, and many of them can easily be changed to fit the circumstances. Many of the Cryptic Alliance or creature names can also be substituted with others by the GM, to allow for even more permutations. Most importantly, remember to have fun!
