How to Generate Gods and Goddesses

To generate gods or goddesses using this product, simply choose an appropriate table and roll once on each column to generate a name for your god, a description of him, the race he serves and what he is a god of. Then take these four results and string them together with “the” and “God of” between the results to make gods such as “Kenny the Wrathful Demonic god of Hay Fever.” Gods can also be generated using only the *Description* column and *God Of* column, just the *Name* column and *God Of* column, just the *Name* column, *Description* column and *God Of* column or just the *Description* column, *Race* column and *God Of* column. These options produce gods like “The Demonic god of Hay Fever,” “Kenny, God of Hay Fever,” “Kenny, the Wrathful god of Hay Fever” or “The Wrathful Demonic God of Hay Fever.” A last option is to roll on the *God Of* column 1d6 times to generate a god with a complex dominion. Finally, while the trivial tables are primarily for fun, the Minor tables allow you to generate a collection of minor gods and goddesses that the craftsman or peasants might pray to and the Major tables create gods and goddesses that are the core of any pantheon.

Using the Alternate Names

The alternate names table allows the creation of more savage gods, totemic animal gods or gods with more fantasy-based names. To use the table, simply choose the desired column and substitute a roll on it for the roll on the name column for the chosen table. The fantasy column may also be used instead or in addition to the description column to add more variability to the above tables.

Note: Totemic animals traditionally are given added titles such as Spirit, Great, Guardian, Grandfather/Grandmother and protector to their names. For example "Spirit Wolf" or Great Owl.
