

101 Starship Names

The following list is intended to be a generic starting point in coming up with starship names suitable for most settings.

One way to increase the number of names available is to combine names, add extra descriptors to the name or even number the ships. So you could have the *Chaos II*, the *Renegade Destiny* or the *Black Sirius*.

Adrenalin
Anaconda
Anitra
Antagonist
Archina
Astor
Athena
Black Magic
Breakaway
Brilliance
Cadence

SOS – Space Opera Support

The Space Opera Support line from Polgarus Games is an aid for busy gamemasters running a game in a space opera setting. No setting is assumed – the products are intended to be as generic as possible so they can be used in most settings. If you need quick adventure ideas, a planet or space station for the PCs to visit, or even passengers to travel on the PCs ship and cause trouble, Space Opera Support is the answer!
